# IDAS™: Improved, Enhanced & More Versatile

## IP67 Waterproof & Dustproof Protection

The IC-F3263D series provides rugged protection against dust and water that is equivalent to IP67. The radio can withstand 1 m depth of water for 30 minutes.

## Man Down and Lone Worker Functions for Emergency Call

The man down function\* automatically sends an emergency signal when the transceiver is left in a horizontal position. The lone worker function also can transmit an emergency signal when the radio is not operated for a preset period. These emergency signals can be sent with GPS position data\* to alert your co-workers or dispatch of any potential trouble.

\* Depending on version.

## 800 mW (typ.) Audio Output Power

The built-in BTL amplifier doubles the audio output power and the large 40 mm speaker delivers loud 800 mW (typ.) audio to receive all calls under noisy environments.

## IDAS™ Features

The IC-F3263D series provides NXDN™ CAI-based IDAS digital mode operation. It is also compatible with NXDN™ Type-D multi-site trunking. The following IDAS features are programmable.

- Individual/group call
- Individual ID and talkgroup ID memories
- Status message
- GPS
- Radio check
- Call alert
- Emergency
- Block decode
- SDM (Short Data Message)
- Stun, kill and revive
- Remote monitor
- Call log
- Digital voice scrambler
- RAN (Radio Access Number)

## Built-in 2-Tone and 5-Tone\*

2-Tone and 5-Tone signalings give you selective calling, quiet stand-by and other convenient functions. The radio stun and kill functions disable a radio over the air and the revive function restores the stunned radio.

## MDC 1200 Compatible\*

The built-in MDC signaling provides the following selective calling and ANI features.

- PTT ID
- Radio stun/revive
- Status message/request
- Emergency, emergency mic monitoring
- SelCall
- Radio check
- 500 aliases
- Call alert

## Scan Features

The IC-F3263D series can detect both analogue and IDAS conventional signals and automatically selects the transmission mode to reply to the received call.

## Built-in Voice Scrambler

The built-in inversion voice scrambler\* provides secure conversation in analogue mode. When using IDAS digital mode, the digital voice scrambler provides a 15-bit key (about 32,000 codes) as standard.

\* Inversion voice scrambler is not compatible with UT-109R/UT-110R voice scrambler.

## Built-in GPS Receiver\*

Your current position data can be attached to a voice or data (SDM, status or emergency signal) transmission and can be sent to dispatch stations\*.

\* Depending on version. \* To show the received position data, an external PC application is required.

## 14-pin Accessory Connector

The new 14-pin accessory connector enhances audio output capabilities with the built-in BTL amplifier. The optional HM-184/H speaker-microphone has a 1000 mW (typ.) audio output for loud and clear communications.

## Large Full Dot-Matrix LCD

Using a large full dot-matrix LCD (32 × 18 mm), the IC-F3263D series shows two lines of easy-to-read text messages. The bottom row shows assigned functions to the [P0] to [P3] buttons.

## Long Lasting Battery Life

GPS type	Digital mode	Analogue mode
Built-in GPS type	10.5 hours (approx.)	11 hours (approx.)
Non GPS type	12 hours (approx.)	12.5 hours (approx.)

\* Typical operation in 5:5:90 duty cycle, power save on.
